## **ECO Restoration & Cleaning Moves HQ to League City (Texas)**

*League City— 7/31/2020* — ECO Restoration and Cleaning opened its new location in League City, TX this spring. The 7300 sq. ft. facility houses the headquarters and leadership for the 17-year old restoration and cleaning services company. The newly-built facility will also offer a showroom for restoration customers to browse contemporary selections from flooring leaders like Bruce, Mohawk, Prestige and AxisCor Flooring. A grand opening event will be scheduled for early 2021 - delayed due to COVID-19 concerns.

Leading the company into establishing its newest location are Michael and Amanda Murphy. No strangers to the cleaning and restoration industry, they have grown into New Mexico, Wyoming, Arizona, Arkansas, Georgia, Louisiana and Colorado markets.

The decision to move their family and the headquarters to Texas was not difficult since the Murphy's have family and friends in the area. "We've visited family here in the League City area for years. And, after Harvey devastated the area, we came to help with repairs and restoration. After that, we made the decision to come and grow our company in this market," Michael explained.

"Our vision for the future is to continue to grow a stronger presence here and also nationally. While we provide many commercial and residential services, including the high demand for home and facility disinfecting, our primary focus is on growing our restoration division," Amanda shared.

About ECO Restoration & Cleaning Services: Headquartered in League City, Texas, a national provider of commercial cleaning and restoration services to retail, restaurant, governmental and financial organizations. Services include: carpet cleaning, water damage restoration, mold damage restoration, fire/smoke damage restoration, air duct cleaning and virus disinfection.
